

Salt Seal[®]

Salt Pile Sealant

Salt Seal[®] has been developed to contain and seal road salt storage piles from wind and rain. This product is a specially formulated polymer emulsion developed specifically for use with chlorides and chloride/sand mixtures. This product will preserve the material inventory while dramatically reducing the damaging effects of chloride contamination in surrounding soil and water supplies. Salt Seal[®] prevents leachate from getting into sewers, streams, rivers and lakes.

Results:

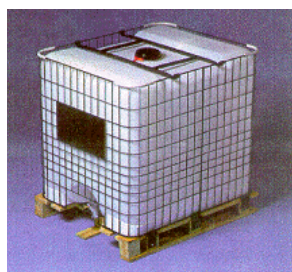

Simple 2-Step Sealing Process Forms Wind and Water Resistant Barrier

1. Spray apply seal coat at 1gallon / 50-80 ft.² of surface and cure.
2. Spray Topcoat at 1 gallon / 100-120 ft.² of surface and allow to cure.
