SPILL AND LEAK PROCEDURES:

contact is expected.

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For small spills wipe up with absorbent materials. For larger spills dyke to control with absorbent material. Prevent product from entering waterways of storm drains.

SECTION VII -- HANDLING AND STORAGE

STORAGE:

Keep container closed when not in use. Store in a location well away from strong oxidizers.

Consumption of food and beverages should be avoided in work areas where product is being used. After using product, always wash hands and face with soap and water before eating, drinking, or smoking.

SECTION VIII -- EXPOSURE CONTROL/PERSONAL PROTECTION

VENTILATION:

Good ventilation or local exhaust. Provide natural or mechanical ventilation to maintain airborne exposure levels below exposure limits.

RESPIRATORY PROTECTION:

If high vapor or mist concentrations are expected, use NIOSH approved respirator for organic vapors (recommended full face) when exposure levels are exceeded. Consult respirator manufacturer to determine appropriate type equipment for given application. Observe respirator limitations specified by NIOSH/MSHA.

EYE PROTECTION:

Safety goggles or chemical splash goggles, especially if splashing is anticipated.

PROTECTIVE CLOTHING:

Wear clothing to minimize skin contact, long sleeves, boots or shoes. Change clothing frequently if contaminated with product. Launder soiled work clothes before re-using. For casual contact PVC gloves are suitable, for prolonged contact use neoprene or nitrile gloves.
