

Dust-Buster® Simplex 3 Shredder Foam Suppression System

The Dust-Buster Simplex 3 shredder foam suppression system is manufactured for smaller recycling operations, typically 5 - 20 tons per hour. Simplex systems do not require costly, high maintenance water filtering and are capable of using both well and industrial water screened to 20 mesh. Each unit is custom engineered based on customer needs. All components utilized are designed for continuous duty and the system includes these features:

- Industrial duty
—water pump, chemical injection pump, water meter, air flow meter, light bar
- Pre-wired Control Panel
- Individual air line for extended runs up to 100'
- Individual chemical solutions line for extended runs up to 100'
- Low maintenance foam accumulator
- Foam discharge line balancing valves
- Dual foam discharge lines along with spray manifold for dual injection points

Dust-Buster Simplex units are wired for typical standard 15v, single-phase, 15 amp service.

A TYPICAL SIMPLEX-3

Up to 60 tph 6 gpd max 100 gph max 8 cfm

**Air supply rated for continuous duty. For alterations to our standard unit, please discuss your requirements with your representative.*
