

COMMONWEALTH OF PENNSYLVANIA
STATE CONSERVATION COMMISSION

February 2, 2018

Midwest Industrial Supply Inc
Attn: Mrs. Cheryl Detloff
1101 3rd St SE
Canton OH, 44707

Dear Mrs. Detloff,

On July 27, 2016 the Pennsylvania State Conservation Commission (SCC) approved an updated and revised version of the **“PA Dirt, Gravel, & Low-Volume Road Maintenance Program Product Approval Instructions”**. As part of the new instructions, the SCC approved recertification guidance to provide a mechanism for previously approved products to be reviewed and come into compliance with the current approval process.

Midwest Industrial Supply Inc’s product EnviroKleen has met all of the requirements for recertification within the Program as defined for dust palliatives, soil stabilizers and other liquid or granular products. EnviroKleen is recertified through December 31, 2022. Your product will be listed as an approved product for use in the Pennsylvania Dirt, Gravel, & Low-Volume Road Maintenance Program, which allows for purchase of EnviroKleen with program funds.

Please note that any change in your products formulation after this recertification approval automatically triggers retesting under the most current requirements of the Program.

For further information regarding product testing and products approved for use in the Program see: http://www.dirtandgravel.psu.edu/PA_Program/Products/products.html

Sincerely,

A handwritten signature in blue ink that reads "Roy Richardson".

Roy Richardson
Dirt, Gravel, and Low Volume Roads Program Coordinator
