

# EnviroKleen®: Technical Sheet

SYNTHETIC  
ORGANIC  
DUST  
CONTROL®

## PRODUCT DESCRIPTION

EnviroKleen® is a patented technology formulated with synthetic fluids enhanced with polymeric binders. EnviroKleen controls fugitive dust and stabilizes the soil using a dual mechanism action. First EnviroKleen weights particles and secondly it agglomerates particles using a re-workable and cohesive action. EnviroKleen is the advance environmental performance solution for dust suppression, fines preservation and soil stabilization.

## APPLICATIONS

EnviroKleen is applied neat to soil using applicator trucks equipped with computerized spray bars. EnviroKleen works well on all soil and aggregate types. EnviroKleen is able to withstand the abuse from tracked and chained vehicles as well as stabilize deep dust and loose surface materials. Because EnviroKleen is easily reworked because it is continually active dust suppression.

## PHYSICAL PROPERTIES

<b>Boiling Point:</b>	>600°F (>316C°)
<b>Specific Gravity:</b>	0.82 – 0.87 (Kg/Litre)
<b>Weight per Gallon (US):</b>	6.83 – 7.25 pounds/Gallon
<b>Appearance:</b>	Viscous, clear liquid
<b>Odor:</b>	None
<b>Solubility in Water:</b>	Insoluble in water
<b>Incompatibilities:</b>	Strong oxidizing materials
<b>Flammability:</b>	Non-flammable, non-combustible
<b>Stability:</b>	Stable under normal handling conditions
<b>Corrosive:</b>	Non-corrosive
